Visitor and conference chair
allright

**The all-rounder
that adapts. Even
to high demands.**

Regardless of whether it be as a conference chair, visitor's chair or for project work: *allright* is a true all-rounder that is suitable for universal use and which can adapt to any situation. With its intelligent concept, it blends harmoniously into any setting, uniting elegance with ergonomics. *allright* is not just a chair for any situation, though. But also for any visual requirements.

The design offers striking details such as a consistent material thickness of seat, backrest and armrest that lends the shell welcome flexibility while providing delicate lightness. There are also many different fitting options that even include high quality leather upholstery, with which *allright* can be customised with stylistic confidence.

Clever design detail.

The small button in the armrest takes up the colour and material of the upholstery, providing added highlights.

Whatever happens: it's alright.

alright has the potential to become a modern classic – not only in terms of its design, but because it can be used universally and combined with other furniture or style worlds, it just goes anywhere – even if there are changes to the furnishing or layout of rooms in the future. That is not only pleasing to the eye, but also to planners, who gain more flexibility as a result.

Adaptable.

Three colours each for shell and frame, plus a huge range of selected fabrics and high quality leather.

Sustainability down to the last detail.

Sustainability and quality “Made in Germany” have been key company principles at Sedus for more than 50 years. Principles that Sedus allright also embodies and which are reflected in ecologically tested materials, energy-conscious manufacturing and ongoing quality tests. On top of that, the resource-saving product design of allright simplifies later recycling and makes it more efficient. Furthermore, solvent-free powder

coating is used in the production of allright instead of conventional paint. And an ultramodern, particularly environmentally friendly electroplating facility, where all metal-containing production residues are fully recycled, is also part of the Sedus philosophy of quality and sustainability. In short: allright delivers a good feeling – not only while sitting.

Environmentally friendly shine.

At Sedus, perfect chrome finishes also mean a treatment plant that removes production residues from the water.

Powder coating instead of painting.

A high quality finish, optimum rust protection and good for the environment too.

Upholstery that lasts longer. Quality that is not only durable but also exemplary in terms of tear and chemical resistance.

Leather from nearby.

Leathers of the highest quality come from southern Germany and Austria via environmentally friendly short transport routes.

Around the world, Sedus adheres to the principles of the UN Global Compact for human rights, labour standards, the environment and anti-corruption.
